

# ENTISYS360 WORKSPACE CLOUD

## Delivering on "Cloud First" Business Priorities

At Entisys360, we believe that digital workspaces should function in a way that maximizes uptime, promotes optimal productivity, and performs in accordance with our clients' business requirements. The Entisys360 Workspace Cloud solution goes beyond Infrastructure-as-a-Service and Desktop-as-a-Service, and is a robust Workspace-as-a-Service offering that delivers on 'cloud first' business priorities by:

- Providing anytime access to applications, desktops and mobility via any device, from anywhere in the world
- Supporting migration of on-premises apps to the cloud, all while minimizing the pain typically associated with updating antiquated virtual infrastructure technologies
- Leveraging core Citrix technologies hosted entirely by Entisys360 and delivered as a service
- Providing on-demand scalability that addresses unpredictable changes in the business and consumption patterns
- Shifting the burden from CAPEX costs to the more predictable OPEX costs

## HOW IS ENTISYS360 DIFFERENT?

We believe that virtual workspaces should function in a way that maximizes uptime, promotes optimal productivity, and performs in accordance with our clients' business requirements. The result is an immediate time-to-value for our clients.

Entisys360's Workspace Cloud is neither a VDI nor Desktop-as-a-Service (DaaS) solution, but rather a fully-functioning workspace environment that enables IT organizations to embrace public, private, and hybrid cloud-based infrastructures.

We have built a customizable enterprise work-flow automation solution with a user self-service portal that provides greater speed for IT organizations to rapidly deliver services to end-users.

Once an IT organization is on-board, new workspaces can be quickly provisioned with the simple click of a button.

*Entisys360 is committed to helping our clients maintain the maximum value of their virtualization and cloud investment, and to free up their team members to focus on more strategic business initiatives. Organizations looking to achieve these objectives can contact Entisys360 directly at [Cloud@Entisys360.com](mailto:Cloud@Entisys360.com), or they can also visit our website at [entisys360.com](http://entisys360.com) for more information on our services.*

## KEY COMPONENTS AND BENEFITS

WORKSPACE MODEL	BRONZE	SILVER	GOLD	PLATINUM
Monthly Cost	Call for more information	Call for more information	Call for more information	Call for more information
Core Applications Included	Adobe AIR, Flash, Reader, Shockwave, Silverlight, Internet Explorer, Google Chrome, Mozilla Firefox	Adobe AIR, Flash, Reader, Shockwave, Silverlight, Internet Explorer, Google Chrome, Mozilla Firefox	Adobe AIR, Flash, Reader, Shockwave, Silverlight, Internet Explorer, Google Chrome, Mozilla Firefox	Adobe AIR, Flash, Reader, Shockwave, Silverlight, Internet Explorer, Google Chrome, Mozilla Firefox
Microsoft Client OS & Office365 Subscription	Customer can leverage a Bring Your Own License model for Office365, or leverage add-on license options	Customer can leverage a Bring Your Own License (BYOL) model for Office365, or leverage add-on license options. Customer can leverage a BYOL for Microsoft Windows Client Operating Systems (OS), or leverage a server OS

Target User	<b>Task Worker</b> Productivity applications, light Internet browsing	<b>Knowledge Worker</b> Productivity applications, moderate Internet browsing	<b>Power User</b> Productivity applications, moderate to heavy Internet browsing, multi-media rich	<b>Virtual Workstation User</b> Productivity applications, heavy Internet browsing, multi-media, design and engineering, advanced graphics capabilities

- A platform that is designed to securely deliver hosted applications, desktops, and mobility by leveraging private, public and hybrid cloud technologies.
- Access to core services and infrastructure hosted in three highly available, fully meshed co-located Tier 3 (99.98%) and Tier 4 (99.99%) rated datacenters in California connected by a 320Gbps ultra high speed rated network, and meets all major compliance requirements.
- Ability to expand to ANY AWS or Azure region for hybrid cloud-bursting when needed to dynamically provide additional cloud capacity on demand for peak usage.
- Flexibility to recoup existing investments by leveraging a bring-your-own-license model for any products included in the solution (Citrix, Microsoft, RES Software, and more).
- The ability to expand to global co-locations or on-premises to customer environments in Bring-Your-Own Datacenter scenarios.
- The utilization of co-locations and customer datacenters and/ or private cloud for hosting legacy infrastructure or other workloads, supported as a managed service.
- Access to a variety of hardware offerings, generic or purpose built to meet requirements, including NVIDIA GRID vGPU, HPE Moonshot with Intel or AMD Graphics, and other leading solutions not available in the public cloud.
- The ability to leverage the Citrix technology stack to deliver virtual desktops, applications, networking and mobility management to their users.
