DEVOPS & CLOUD
FROM ENTISYS360

By Gartner's definition, DevOps should "emphasize people (and culture), and seek to improve collaboration between operations and development teams."

At Entisys360, we consider DevOps to be at the heart of everything we do. And, it is through our DevOps Practice that we differentiate ourselves from our competition. For instance, at core of our DevOps and Cloud Service Practice is a firm commitment to helping our clients drive change within their IT cultures. As such, we leverage DevOps to accelerate IT service delivery for our clients through the adoption of agile methodologies that are all part of a systems-oriented approach.

CORE PRACTICE OFFERINGS

Time is money, and you need a partner than can get you where you want to go, quickly and efficiently. Entisys360 offers a number of different DevOps consulting engagement options that are customized to meet the unique needs of your organization, regardless of where you are in your DevOps journey.

Architecting cloud deployments that are flexible, scalable and have the right mix of public and private cloud elements can be challenging, for even the most cloud-savvy organizations. Entisys360 offers several Cloud consulting engagement options that are customized to meet a diverse range of business requirements.

DevOps Strategy and Consulting

Through DevOps Strategy and Consulting, Entisys360 can help you begin leveraging DevOps, or optimize your existing DevOps program.

Infrastructure Automation

Entisys360 has the expertise to automate your infrastructure and help you achieve instant scalability, consistency and 100 percent repeatability.

Operational Analytics

Entisys360 can provide you with increased visibility into your operations and key performance indicators (KPIs) through strong feedback loops and actionable insights for continuous improvement.

Continuous Integration (CI) and Continuous Delivery/ Deployment (CD)

Entisys360 can empower your developers to perform their own application releases, which in turn will enable your organization to bring new, higher code quality level features to market with greater speed and agility.

Microservices and Platform-as-a-Service (PaaS)

Entisys360 can help your organization achieve a containerized, microservices-based PaaS architecture which will allow you to accelerate your DevOps/Cloud adoption, while at the same time maximizing the return on your existing and planned IT investments.

DevSecOps

With instances of ransomware, malware, phishing and other cyberattacks on the rise, cybersecurity remains a top concern, especially for businesses in regulated industries such as healthcare, financial services and retail. Through DevSecOps, Entisys360 can help you deliver infrastructure and application environments that are hardened and secure by default.

At Entisys360, digital transformation is about helping IT organizations provide a better experience for their end-users, while at the same time fulfilling a long-held dream of making IT a competitive differentiator. Organizations looking to achieve these objectives can contact Entisys360 directly at DigitalTransformation@entisys360.com, or they can also visit our website at www.entisys360.com for more information on our services.

DEVOPS & CLOUD

Entisys360's Cloud Services Packages
Architecting cloud deployments that are flexible, scalable and have the right mix of public and private cloud elements can be challenging, for even the most cloud-savvy organizations.
