

LIFECYCLE MANAGEMENT

Entisys360 provides organizations with expert resources to manage the operational and lifecycle activities associated with IT infrastructure. Our experienced team applies a best practice approach to ensure key components of the IT infrastructure are professionally managed, allowing IT personnel to focus on delivering value to the business.

Services Overview

MA	PM	EMP	EIP	AIM
MONITORING AND ALERTING	PATCH MANAGEMENT	ENDPOINT MANAGEMENT & PROTECTION	EMAIL INTEGRITY & PROTECTION	ASSET & INVENTORY MANAGEMENT
Entisys360 provides real-time performance monitoring of business-critical environments including hardware, applications, networks and the user experience. Includes the ability to alert, escalate and remediate outages in a proactive manner, resulting in a more stable infrastructure.	Entisys360's Patch Management Service offers the ability to secure desktops, servers and other network devices by proactively scanning, detecting and patching vulnerabilities of operating systems and third-party applications, preventing unexpected downtime and protecting sensitive data.	Entisys360 provides real-time endpoint and entry point security for all of your endpoints including servers, desktops and mobile devices. We also provide comprehensive prevention and protection to safeguard infrastructure against cybersecurity vulnerabilities, malicious attacks, ransomware, DDoS attacks and more.	Entisys360 identifies and protects against email threats before they arrive in user mailboxes. This includes assistance with managing users and domains, creating filters and sender lists, managing spam and generating reports.	Entisys360 provides real-time discovery and inventory of IT assets that are connected on their networks and client owned devices used in remote locations.

LIFECYCLE MANAGEMENT

Entisys360's Methodology and Goals

In delivering Lifecycle Management Services, Entisys360's processes and methodology involve:

- Assessing the current environment
- Developing a plan to address client requirements and best practices
- Reviewing recommendations
- Service implementation
- Continuous lifecycle management and optimization
- Ongoing metrics and reporting

With any Lifecycle Management Services deployment, our goals are to:

- Achieve seamless operations
- Minimize downtime by proactive management of critical systems
- Build trust that environment is professionally managed
- Improve network availability, scalability and resiliency
